

# Gateway GP6-350

 **This machine is in a non-functional state.**

Originally owned by my nan (or at least, it was stored in her house), this was my first ever computer sometime in 2008-ish. Unfortunately, I believe the PSU is broken as the unit no longer turns on, and every CD drive I've inserted has been killed. When I eventually get around to ordering a replacement PSU I'll be sure to test each component. The HDD definitely still works.

Specifications	
<b>CPU</b>	Intel Pentium 3
<b>GPU</b>	ATI 3D Rage Pro
<b>RAM</b>	64MB
<b>HDD</b>	Maxtor DiamondMax 3GB
<b>OS</b>	Windows 98
